## NeoColab\_REC\_CS23231\_DATA STRUCTURES

### REC\_DS using C\_Week 1\_COD\_Question 6

Attempt : 1

Total Mark : 10

Marks Obtained : 10

### Section 1 : Coding

#### 1. Problem Statement

John is tasked with creating a program to manage student roll numbers using a singly linked list.

Write a program for John that accepts students' roll numbers, inserts them at the end of the linked list, and displays the numbers.

#### ***Input Format***

The first line of input consists of an integer N, representing the number of students.

The second line consists of N space-separated integers, representing the roll numbers of students.

#### ***Output Format***

The output prints the space-separated integers singly linked list, after inserting the roll numbers of students at the end.

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: 5

23 85 47 62 31

Output: 23 85 47 62 31

### **Answer**

```
struct Node* insertAtEnd(struct Node* head,int rollNumber){
    struct Node* newn=(struct Node*)malloc(sizeof(struct Node));
    newn->rollNumber=rollNumber;
    newn->next=NULL;
    if(head==NULL){
        head=newn;
        return newn;
    }
    struct Node* temp=head;
    while(temp->next!=NULL){
        temp=temp->next;
    }
    temp->next=newn;
    return head;
}

void display(struct Node* head){
    struct Node* temp=head;
    while(temp!=NULL){
        printf("%d ",temp->rollNumber);
        temp=temp->next;
    }
}
```

**Status : Correct**

**Marks : 10/10**
